EXPERIENCE 9 YEARS

WELLS FARGO | SENIOR SOFTWARE ENGINEER

Sep 2023 – Present | Bangalore, India

- Developed a cloud-based solution to automate and enhance the engineering process for cheque processing using Java 17, Spring Boot, AKS Azure.
- Created REST API to process and track check processing.
- Worked with other teams to receive event on Kafka related to check processing and validation.
- Migrated micro service projects from Public cloud foundry to Open shift cloud for existing cheque operation application.
- Used ReactJs to design single page application to display check processing steps and operator can take decision to validate check data.

NAGARRO | STAFF ENGINEER

Aug 2021– Sep 2023 | Gurugram, India

- Developed CRM related micro services using Spring REST and Java 11 and handled micro services related security using Spring Security and JWT.
- Participated in requirement gathering and analysis for feasibility to migrate on AWS cloud and Amazon EKS.
- Implemented REST API request/response payload validation with Json schema by implementing the interceptor.

MONOCEPT | SOFTWARE ENGINEER

Aug 2017 – July 2021 | Gurugram, India

- Implemented Spring AOP feature for logging.
- Implemented Spring Security JWT feature for authenticating microservices.
- Designed an Angular one-page application and consumed REST API payload.
- Consumed SOAP web service using Apache axis 2 and WSDL.
- Developed multiple REST API for insurance-based system for banking clients.

CURRENT PROJECTS

CHIMG APPLICATION | WHOLE-SALE EXTRACT SERVICE

Sep 2023 – Present | Bangalore, India

- As part of cheque modernization project, we are building new microservice and exposing REST API to inspect cheque TIFF images and return quality checks report(IQA) by Whole-Sale Extract Service.
- Average volume per day: approximately 10 million peaks.
- Expected SLA: 100 ms at 95
- Expected throughput: 1200 to 1500 checks per seconds at peak.
- Tech stack: Java 17, Spring Boot, Spring Security, Circuit Breaker, PostgreSQL, Docker, Redis cache, Azure, ReactJS.

PME APPLICATION | PAYMENT MANAGEMENT ENGINE

Sept 2023 – Present | Bangalore, India

- PME is a monitoring application that monitors imaged-based payment application. It is the monitoring tool used by the PMC Team. The business impact team members are responsible for monitoring the cheque image item processing.
- Tech stack: Java 17, Spring Boot, Oracle, ActiveMQ, Redis cache, PCF, ReactJS.

EDUCATION

CENTURION UNIVERSITY

B.TECH IN COMPUTER SCIENCE

Period: Aug 2011 - Nov 2015

Odisha, India

CGPA: 7.6 / 10

SKILLS

PROGRAMMING

- Java • Spring boot • Hibernate
- Spring Security • Spring Cloud
- Docker and Kubernetes
- Kafka and RabbitMQ
- MySQL • PostgreSQL
- MongoDB • Redis Cache
- Angular • ReactJS

TECHNOLOGY

- Git/Github • AWS • Linux
- REST API • SOAP Web Services
- Jenkins CI/CD
- Junit and Mockito
- Apache tomcat and Wildfly
- Grdale and Maven
- JSON • JAXB/JAX-WS
- Terraform • Harness • UCD

ADDITIONAL

- Object Oriented Programming
- Multi Threading • Stream API
- Data structure and Algorithm
- Design Pattern • System Design
- Microservices • Solid Principle
- AI/ML • GitHub Copilot
